

HOW TO INSTALL GCC COMPILER FOR EXECUTE C PROGRAM IN WINDOWS 7/10

STEP 1: Download gcc compiler

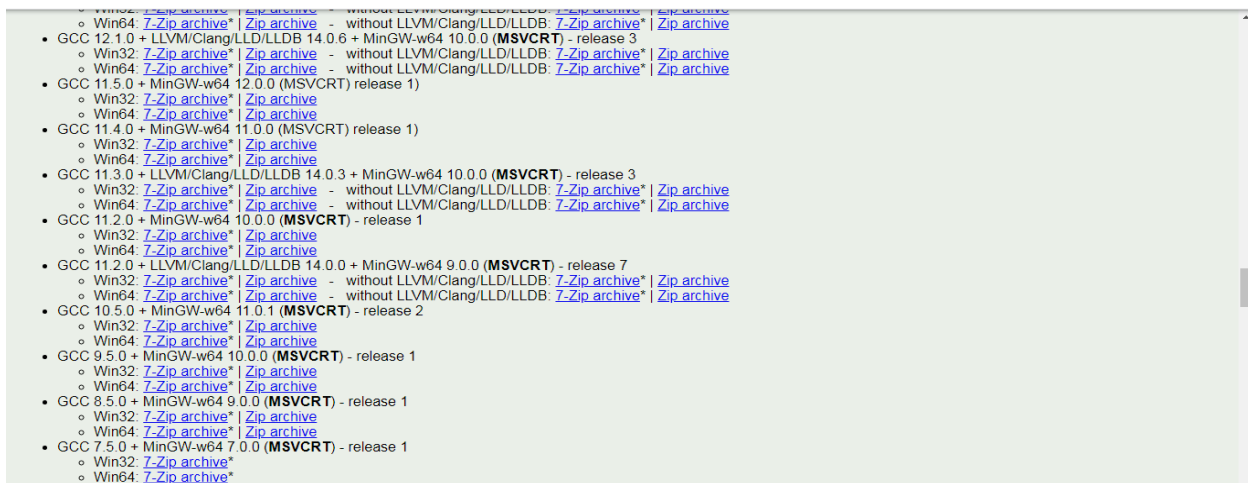

Website link: Type winlibs in search engine.

Click on first link: <https://winlibs.com/>

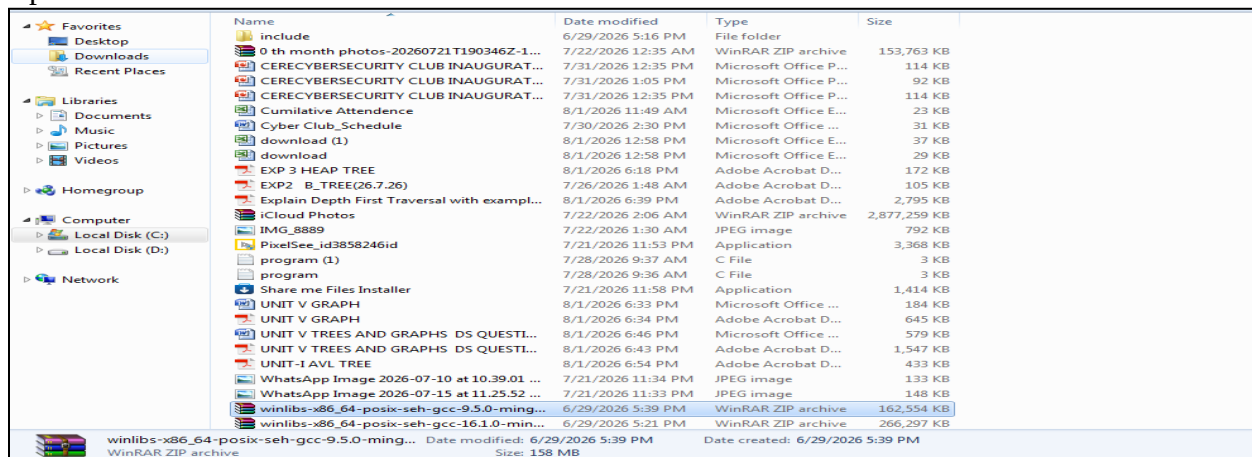

To get future Google Chrome updates, you'll need Windows 10 or later. This computer is using Windows 7.

[Learn more](#) X

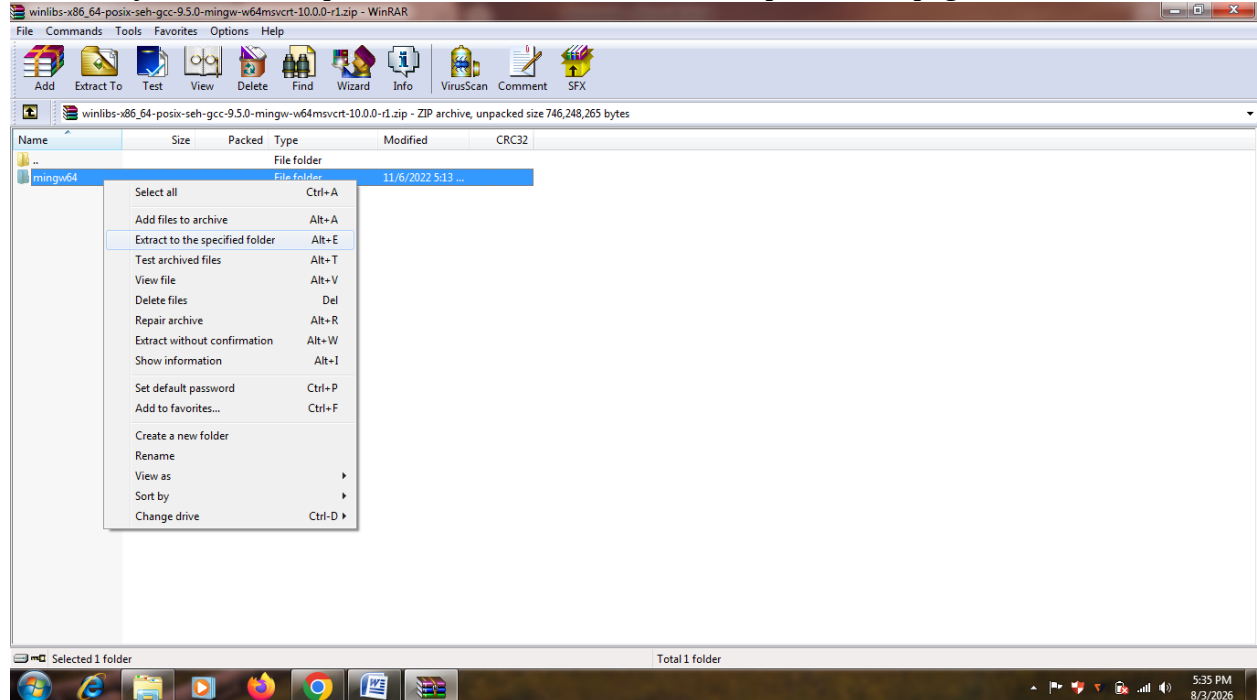

Go to GCC 9.5.0+mingw-w64 10.0.0 -> click on win 64: 7- zip archive -> automatically it downloaded .

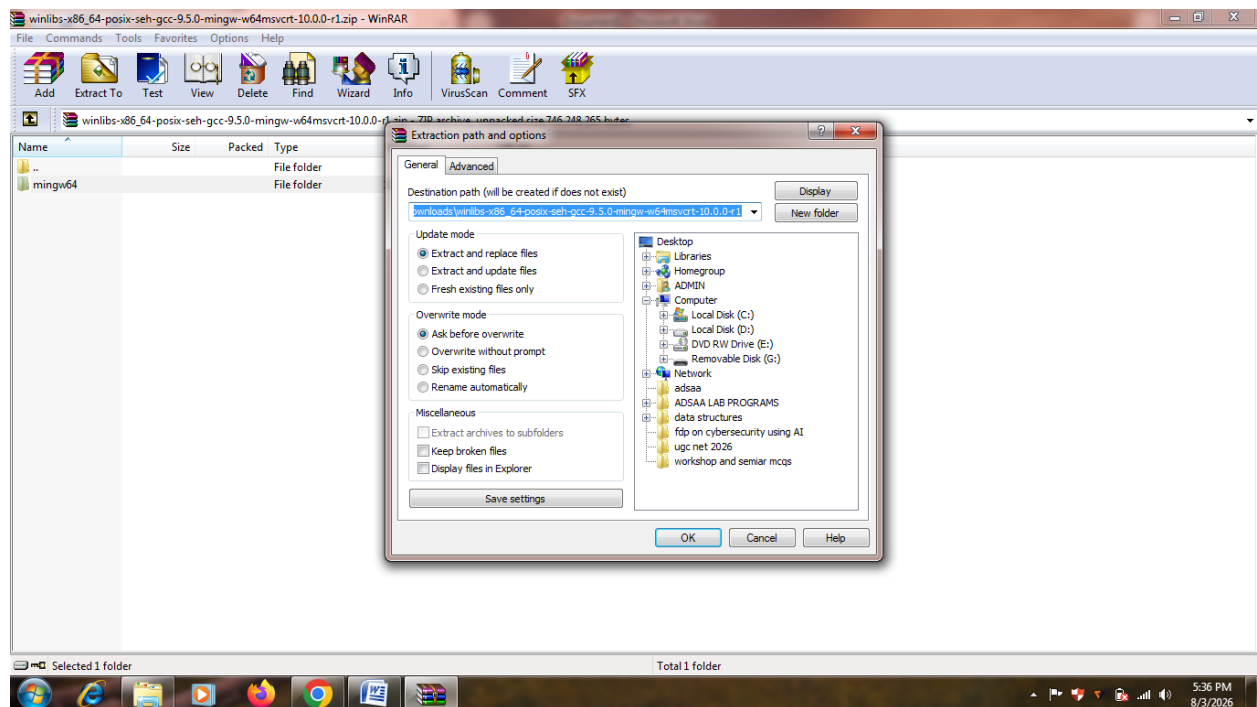

Open that downloaded file.

In above you can find zip archive file-> double click on zip file. This page will be visible.

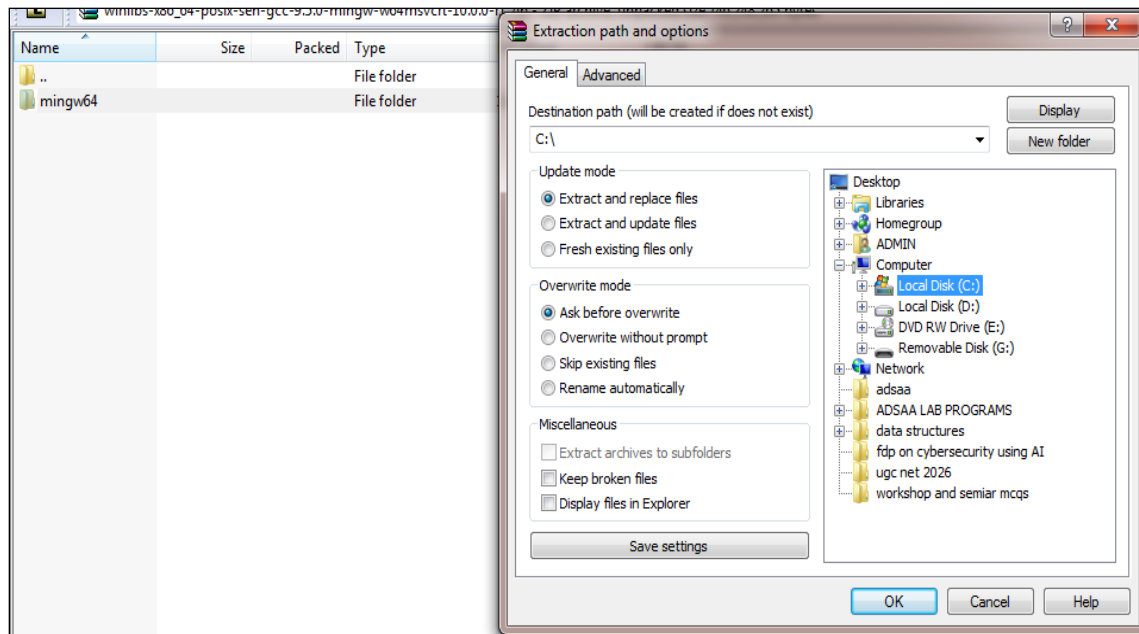

On mingw64 ->right click on folder and choose Extract to the specified folder

STEP 2: Extract folder and place it in local disk c

In above page choose Local Disk(c:) -> then page will look like this

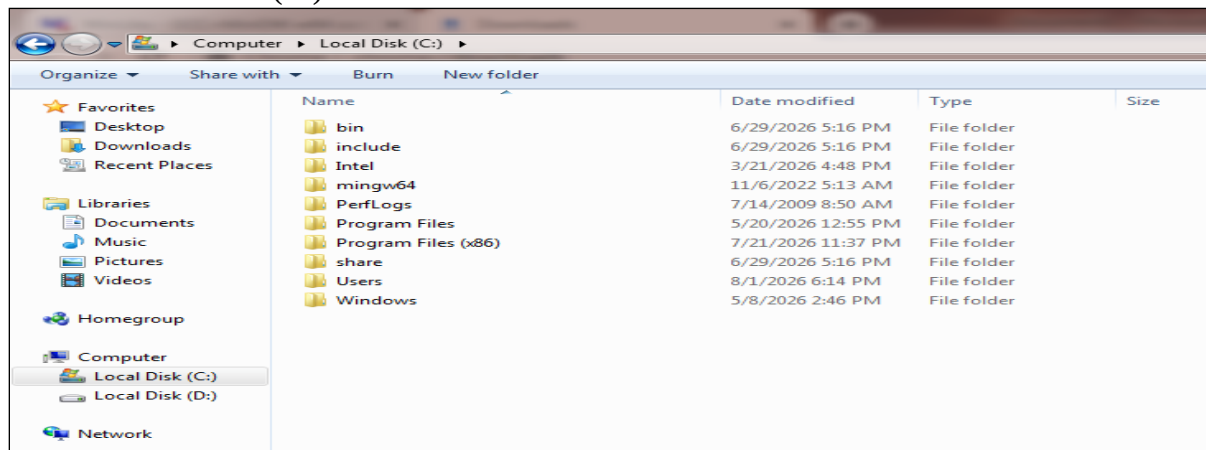

Click on ok.

It start copying this folder to local disk(C:)

Step 3: go to This PC-> double click on Local Disk(C)-> you can u r minw64 folder(gcc)

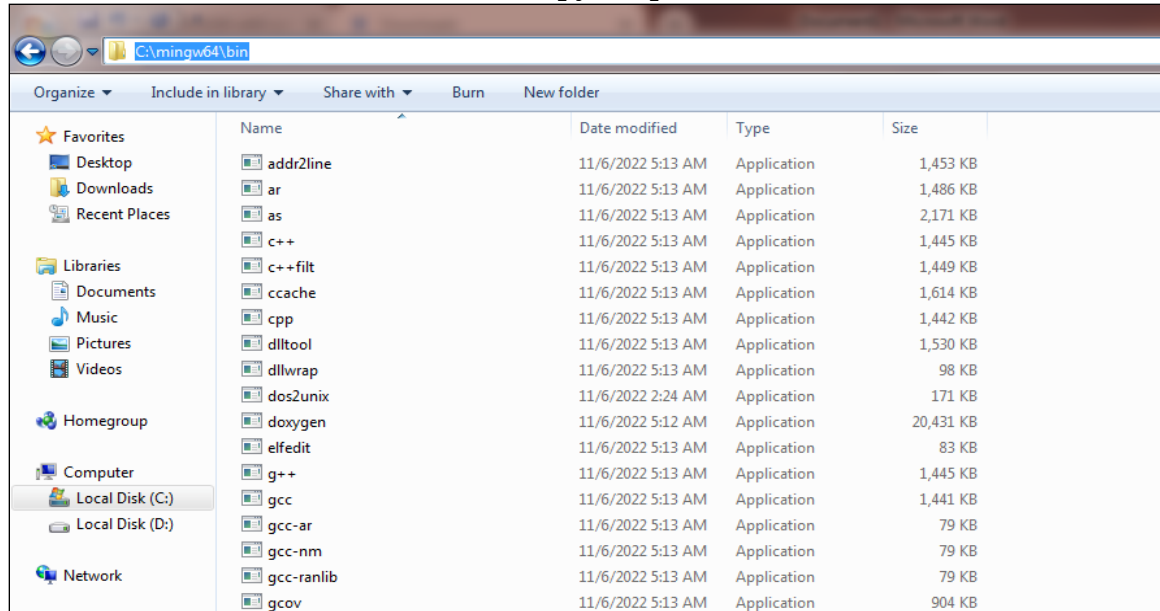

Click on Local Disk (C:)

Now you can see mingw64

Step 4: set path for gcc in Environment variable

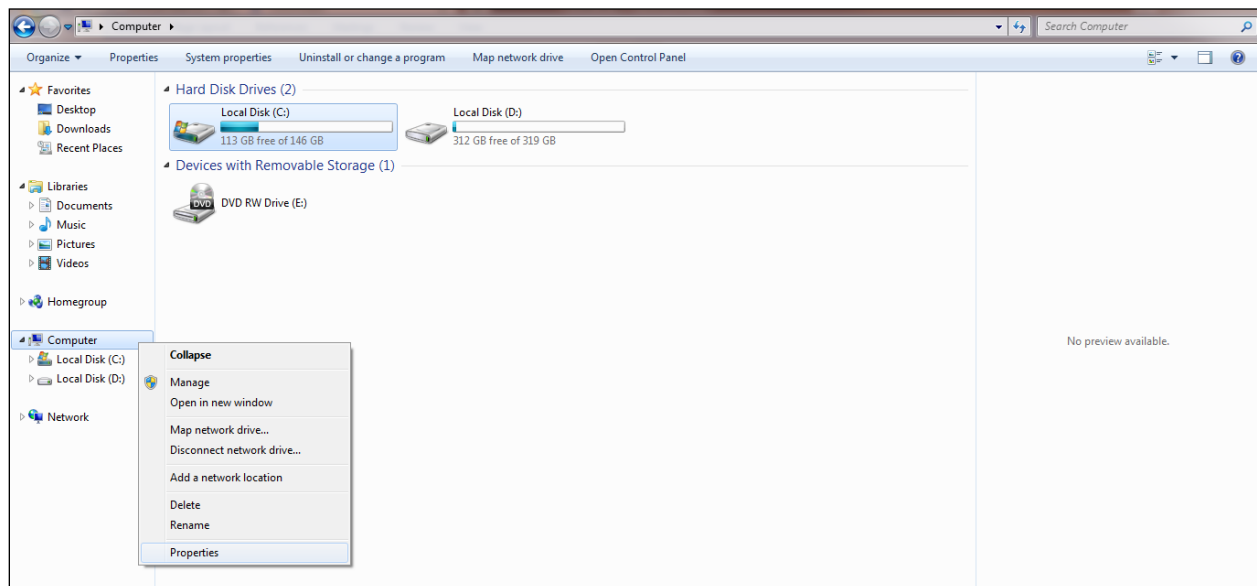

Go and click minw64-> click on bin-> copy the path address

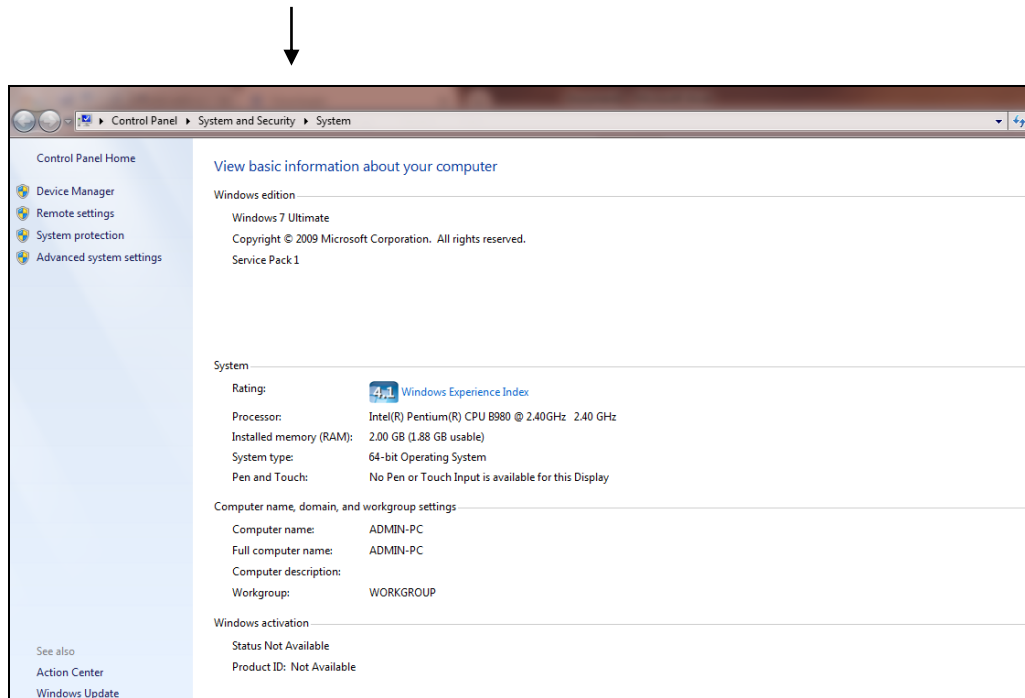

Path address: C:\mingw64\bin

Step 5: Go to This pc or computer

Right click on computer and select Properties

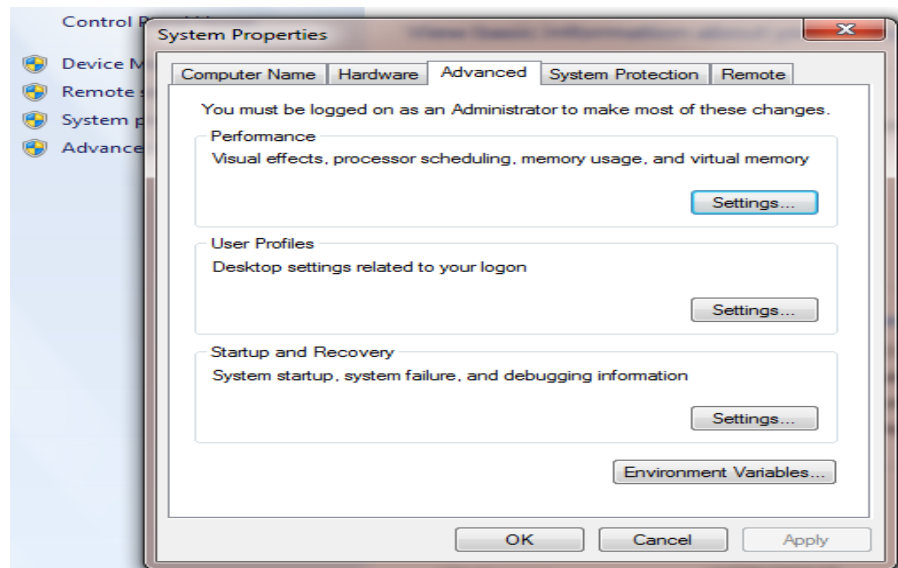

This screen is visible.

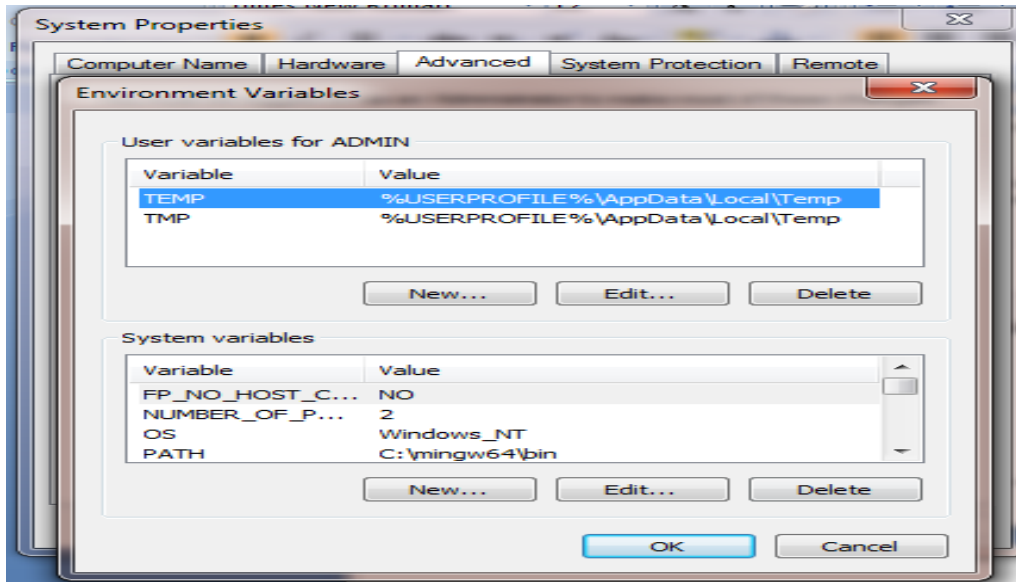

This screen appears

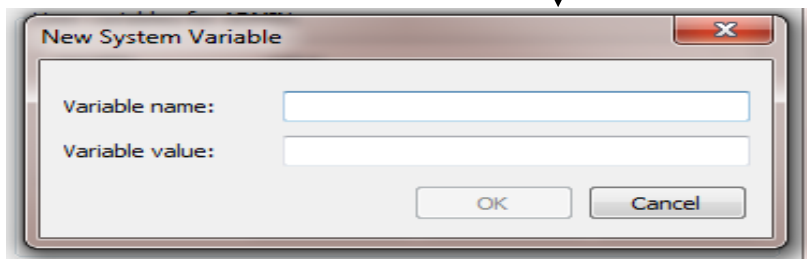

In above screen select **Advanced system settings**

Click on Environment Variables

Go to system variables → click on New

Type Variable name : path
Variable value: C:\mingw64\bin

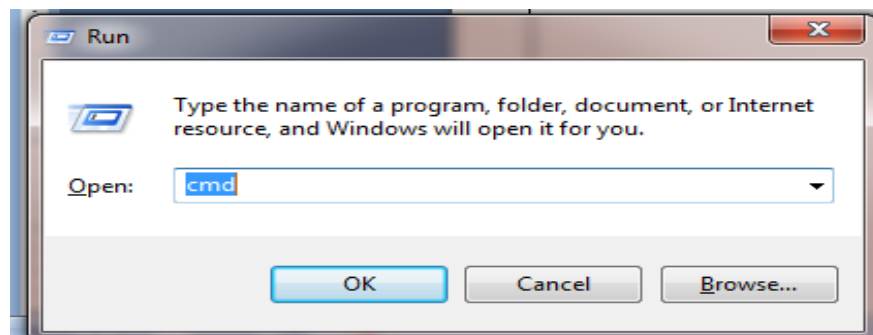

(path address)

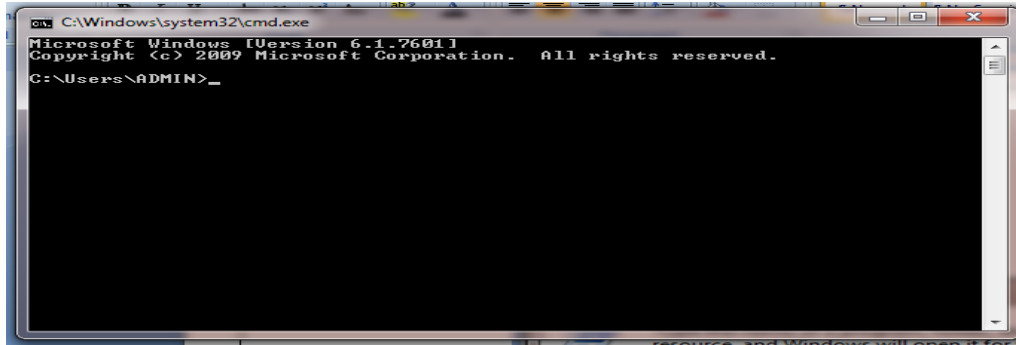

Click on ok, ok, ok (3 times)

Check version is installed in your system:

Open control panel

Type cmd

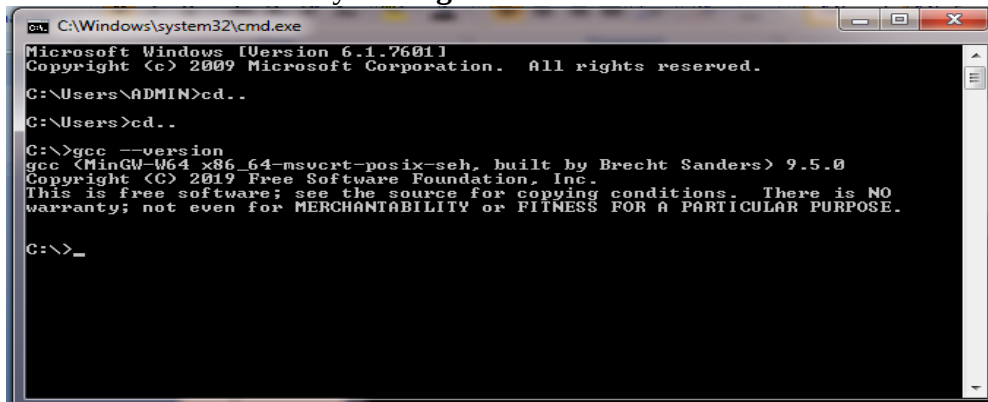

```
C:\Windows\system32\cmd.exe
Microsoft Windows [Version 6.1.7601]
Copyright (c) 2009 Microsoft Corporation. All rights reserved.
C:\Users\ADMIN>
```

I installed in c drive , check version in c using this command

Syntax: **gcc --version**

```
C:\Windows\system32\cmd.exe
Microsoft Windows [Version 6.1.7601]
Copyright (c) 2009 Microsoft Corporation. All rights reserved.
C:\Users\ADMIN>cd..
C:\Users>cd..
C:\>gcc --version
gcc (MinGW-W64 x86_64-msvcrt-posix-seh, built by Brecht Sanders) 9.5.0
Copyright (C) 2019 Free Software Foundation, Inc.
This is free software; see the source for copying conditions. There is NO
warranty; not even for MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE.
C:\>_
```

Therefore gcc is installed successfully in windows 7/10

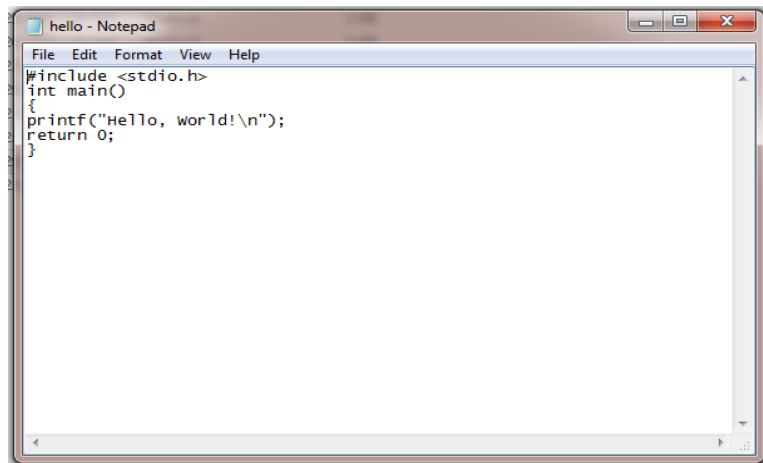

Write a sample c program for print Hello world and run in command prompt

Step 1: write c program in Notepad

↓
Open Notepad

↓
Save the file as hello.c in Local disk(D:)

Type program:

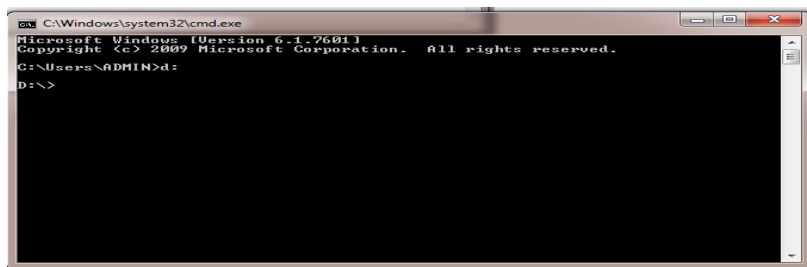

```
hello - Notepad
File Edit Format View Help
#include <stdio.h>
int main()
{
printf("Hello, world!\n");
return 0;
}
```

Step 2: Execution of c program

Go to control panel(Window +R)

↓
Type cmd
↓

```
C:\Windows\system32\cmd.exe
Microsoft Windows [Version 6.1.7601]
Copyright (c) 2009 Microsoft Corporation. All rights reserved.
C:\Users\ADMIN>d:
D:\>
```

(I copied hello.c in D folder)

↓

Enter into D folder by using command -> **d:**

For Compiling syntax:

gcc filename.c -o filename.exe

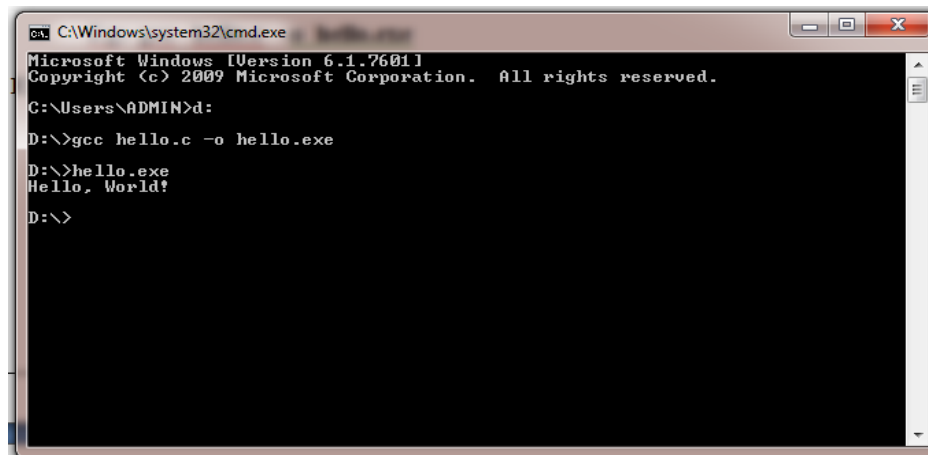

Eg: gcc hello.c -o hello.exe

For Execution:

Syntax: filename.exe

Eg: hello.exe

↓

```
C:\Windows\system32\cmd.exe
Microsoft Windows [Version 6.1.7601]
Copyright (c) 2009 Microsoft Corporation. All rights reserved.

C:\Users\ADMIN>d:
D:\>gcc hello.c -o hello.exe
D:\>hello.exe
Hello, World!
D:\>
```

Result: output is executed successfully in cmd
